

Managed LAN

demand more from
your network – then
forget about it

“Managed LAN gives me access to a local network designed with my company and my staff in mind. I can call on expert skills I don't have internally as well as personalized assistance services.”

Denis S.
Information Systems Manager

- simple turn-key solution for managing LAN and wireless LAN infrastructure
- built-in security and reliability for improved service levels
- seamless global service integrated with Business VPN in more than 150 countries
- wide range of options, allowing you to take control of your network based on your business requirements
- lower costs and improved performance with less administrative and management overhead
- pay-as-you-go pricing means no capital expenditure

**Business
Services**

simplify the day-to-day management of your LAN

- enjoy a simple, turn-key solution. Based on your needs, our certified consultants will design your LAN or wireless LAN. Count on their advice concerning future developments in line with your business and technical requirements
- rely on our field service experts in over 150 countries to assist you with international logistics and installation. Our 24x7 service desk supervises your operational LAN environment, resolves issues and secures your network
- manage your service in real time with easy-to-use tools, dedicated customer care and a “one-stop shop”
- contribute to your company’s good citizenship in reducing CO2 emissions by reducing travel miles. Our teams are local and will act on behalf of your own IT staff

take control of your LAN budget

- eliminate network investments and capital expenditures from your balance sheet and keep your budget and cash flow focused on your business
- select the service you need only where you need it. Managed LAN includes flexible options and all the hardware you need for all your sites, from small branch offices to large data centers
- simplify accounting with one contract and one monthly bill, no matter what your coverage is

improve service levels

- hand your entire infrastructure over to a single, experienced provider who can deliver operational reliability according to strict service level standards for all your WAN, LAN and WLAN needs. Interoperability issues and multi-partner management will be a thing of the past
- increase employee satisfaction with Managed LAN by supporting the most demanding multimedia and business applications. The service is completely compatible with other VPN, voice and video solutions
- gain visibility through monthly reporting, and control performance according to your specific SLAs
- improve consistency by using a major worldwide integrated operator with an extensive service portfolio. We have a full range of additional services and options available across the globe, including unified communication and collaboration services, consulting and on-site management

good to know

We have based our services on the best-of-breed technologies from the market leaders, Cisco and HP, and have met their highest standards of networking competency, service, support and customer satisfaction around the world to become their preferred service provider partner, wherever you need us.
