

A la carte management of my IT

Care

Managed Applications

Your applications managed based on your requirements

A global and redundant infrastructure designed to host your most demanding critical applications.

Industrial processes, inspired by ITIL best practices, offer an unparalleled quality of service.

A catalogue of over 50 supported middleware products.

Business Services

Outsource the exploitation of your infrastructure via an à la carte solution designed to match your IT strategy

Managed Applications give you the choice of operating your services internally or outsourcing them to our teams.

We support you during your entire transformation to the Cloud thanks to our architecture, design and migration services which include tests of your applications on our platforms.

Our three levels of services (Bronze, Silver and Gold) allow you to choose the level you want on an application by application basis.

An infrastructure secured by our experts

The security of our services is guaranteed by a dedicated team that works closely with the Orange Cyberdefense division and applies the SecNumCloud recommendations which include: DDoS protection, vulnerability scans, securing administration zones, web filtering.

Our datacentres are located in major geographic areas, giving you the flexibility to choose the location of your data based on your requirements.

Our services are ISO27 K certified.

Overview of our services

- **Operating systems:** Linux, RedHat, Windows Server, Suze
- **PaaS:** Map Reduce Services, RDS MySQL, Platform.sh
- **Middleware:** databases, web servers, application servers, file services, directories...
