

Business VPN

the foundation for your
communications supporting all
business applications via an
MPLS-based private network

Is your business expanding into emerging markets? Do you need solutions that adapt to all your sites' needs: headquarters, regional facilities and branch offices? Are you looking for new and converged solutions that will increase your productivity? Have you considered your current needs as well as your future requirements for your worldwide VPN?

We can help you address all of these questions. We're a world leader in IP-based VPN services with an extensive installed customer base. Our flexible and integrated Business VPN solution offers IP services via a simple any-to-any connection for all of your sites. With the largest global MPLS-based VPN in the world, commercially available in 220 countries and territories, we are available wherever you are.

simplify your VPN

■ need simplicity?

Business VPN is based on two site profiles adapted to your requirements. Your site needs and uses will automatically trigger the appropriate package, whatever the access technology.

■ need more flexibility?

To meet each sites' specifics, Business VPN is based on a feature-rich commercial catalog with a full range of options activated per site (continuity, voice, video, Internet, etc.).

■ need totally secure information transfers?

Business VPN is an MPLS-based service that is secure by design and protects all your information flows from end to end in 220 countries and territories.

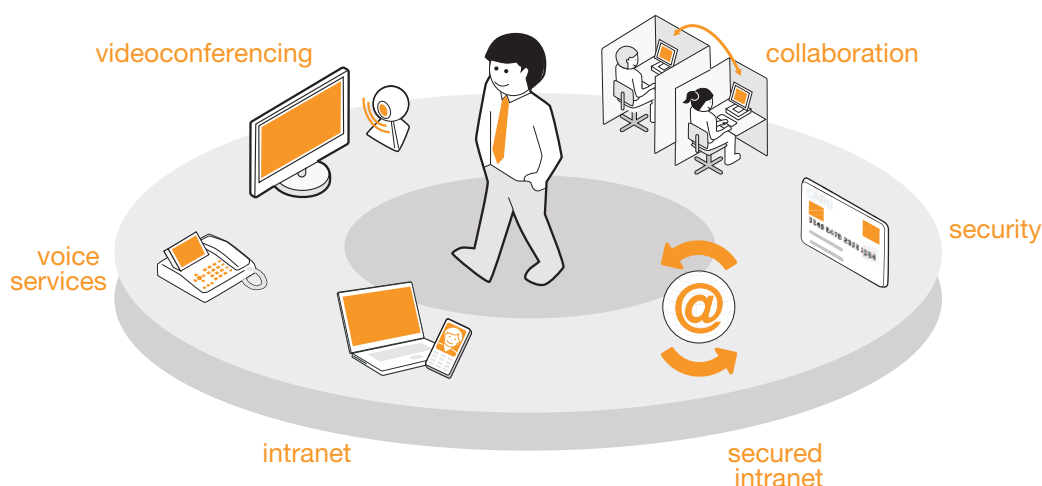

■ need access to the most innovative services?

Select the latest IP convergence technologies from our robust service catalog (telepresence, IPv6, collaboration, etc.).

tailor a solution to your needs

Business VPN simplifies the approach to networks and offers you total flexibility for your intranet, Internet, voice or telephony over IP, videoconferencing and collaborative workflows.

You choose your services from a predefined catalog based on the size of your business and the number of sites you operate. Then you build a profile for each of your sites based on the service level you need: small or corporate. **You activate only the services that your business really needs.**

benefit from a **powerful network**

get a jump on the competition

When you choose Business VPN, you get access to today's most innovative services. Drive your current and future growth, make your employees happy and transform the network into a competitive advantage for your business.

join the era of multimedia convergence

Designed to work as a single and unifying platform, Business VPN gives you access to all of our advanced telecommunications services, but without the technological hassles. We manage the technical details while you focus on your core business.

enable better productivity

What matters to your employees is application performance; that's why we provide application service level agreements with Network Boost. Our application performance solution will turbocharge your information flows and efficiency, so your employees can work better and faster.

cut your costs with a smart design

By choosing only the services you really need based on site profiles and uses, you only pay for what you actually need and save money.

market-leading **know-how**

worldwide coverage

A recognized leader in IP networks, Orange Business Services offers you the assurance of unmatched expertise for an outstanding customer experience.

end-to-end assistance

Orange Business Services will help you choose your network solution and can work with you throughout the design, implementation and maintenance stages, including plans for future upgrades. Our suite of customer care services, Service Select, uses the best-practice framework of ITIL® (IT Infrastructure Library), the recognized standard for excellence in IT operational support.

strong service level agreements

Business VPN ensures simplified and optimal availability and security of your network, with service level agreements based on indicators adapted to your chosen profile. We protect your business with a strong business continuity plan on our core network and provide a complete range of back-up solutions at site level.

advanced innovation skills

The quality of our network is built on our worldwide innovation network, Orange Labs. Made up of 5,000 skilled staff across four continents, we are able to give you access to the latest technology advances.

The scalability of Business VPN is the foundation of a cloud-ready network and can support your transition to IPv6 and very high broadband as well as other future innovations.
